KEYNOTE SPEAKER

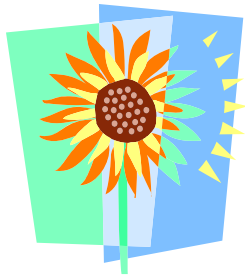

Lanny Butler

Dementia Possible Care

What we perceive to be true becomes our reality. If you believe that an individual with dementia is unable to bathe, dress, feed and toilet themselves, that will become your loved one's reality, only because you have made it so for them. Often we unknowingly take away these abilities out of love, but also out of ignorance of what can be done. By doing for them we have taken away their ability to participate in life, and have taken away much joy we could have shared together. It is our attempt to provide you an alternative to caring for your loved one, change your perception of the process of dementia, and therefore change your reality of what is possible in the months and years ahead. We call our approach to living with dementia, **Dementia Possible Care**.

Lanny butler MS, OTR is founder and President of IATB Dementia Care, a private consulting group on Dementia Possible Care giving. He lectures throughout the United States on Dementia Possible Care, and is author of *My Past Is Now My Future: a Practical Guide to Dementia Possible Care*.

Mr. Butler has primarily treated the geriatric population for the past 24 years in the outpatient, acute care, and long term care setting. Lanny has served as a Clinical Resource specialist for Rehab management, Inc., a long term care provider, for 7 years. He continues to provide ongoing staff training, clinical competencies, and program development in multiple aspects of geriatric care and has incorporated an interdisciplinary effort among the therapists he serves. The focus of his work has been the enhancement of clinical excellence for those who serve the geriatric population.
